

The 150th Anniversary

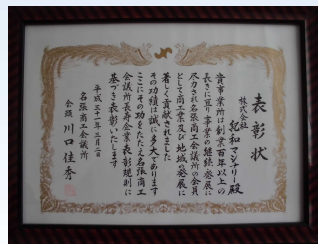

We are pleased to inform you that this year (2019), KIWA MACHINERY celebrates the 150th anniversary since we were established in 1869. We really believe that it is a gift of everyone's patronage, and we will keep trying our best for our costumers' satisfaction. We look forward to your continuous support.

Nobumasa Kiwa, President

Award for Longevity Company

KIWA received an award from the Nabari Chamber of Commerce and Industry as a company which has a history of over 100 years. On Mar. 2, 2019, the ceremony was held, and we were given a commendation and award plaque.

Introduction of New Employees

The welcoming ceremony was held on Apr. 1, 2019, and two new employees joined our company.

Greetings from new employees

I am honored to be a new employee of KIWA MACHINERY from April. I will do my best with a beginner's spirit to get used to the work as soon as possible. I would appreciate your generous guidance.

Kidai HASEGAWA

I am really happy to start working in KIWA MACHINERY. I am new and inexperienced, but I will do my best. I would appreciate your generous guidance.

Keita KAWAMURA

EMO Hannover 2019 · MECT 2019 Nagoya Japan

EMO Hannover 2019

EMO Hannover 2019, one of the biggest International Machine Tool exhibitions, will be held from 16th to 21st, September in Hannover, Germany. EMO takes place every two years in a cycle of twice in Hannover then once in Milan, Italy.

KIWA exhibits machines as below.

➤ **KH-4500kai, Horizontal Machining Center (with 6 APC)**

This is the latest generation model of KH-45 series with new design and various functions. The rear chip management helps efficient chip disposal and high maintenance performance. Although KH-4500kai has the same footprint as KH-45/4500, the strokes are 700 mm (X) and 740 mm (Y). It becomes possible to machine larger work pieces.

The exhibit machine is equipped with an optional 6-pallet APC unit.

➤ **KH-4100, Horizontal Machining Center**

Despite it designed as slim as possible, just 1530 mm wide, KH-4100 is equipped with abundant features. High cost performance will be shown not only on its own, but also on machining lines. A variety of options can be added according to customers' preference.

When you come to EMO Hannover 2019, please come and see our machines.

Mechatronics Technology Japan 2019

MECT (Mechatronics Technology Japan) will be held from 23rd to 26th, October in Nagoya, Japan. MECT is a machine tool exhibition started in 1987. It is held in autumn every two years at Port Messe Nagoya City (Nagoya Int'l Exhibition Hall). This year is also the 150th anniversary of KIWA MACHINERY. With all our gratitude for your patronage, we have a plan to have special events during the show.

KIWA exhibits a machine as below.

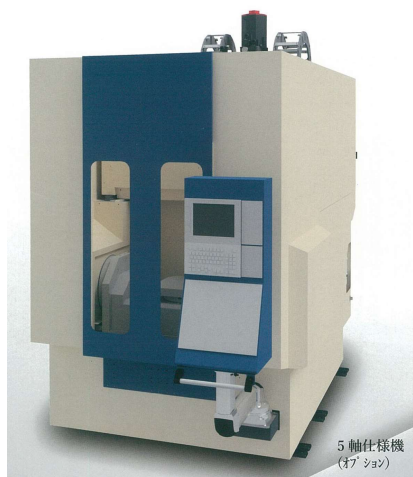

➤ **Triple V40, Vertical Machining Center (with 5 axes)**

KIWA developed a vertical machining center with column traverse structure which separates the machining area from the driving mechanism. Because of no table movement, it is possible to install various fixtures and rotary tables according to customers' application and demands. Isolation of the machining area and "Armless" ATC system enable the machine to keep good condition and to work accurately. This machine also can be used as [a grinding center to machine glass and ceramics](#).

The exhibit machine is shown with a special rotary table.

We are looking forward to your visit.
