

JIMTOF 2026 Exhibition Information

KIWA will be on display at this year's biannual Japan International Machine Tool Fair "JIMTOF". While space is limited with the Tokyo Big Sight venue currently undergoing renovations, we will still be putting the pride of our company, the 3-Axis Column Traverse cutting edge **Triple V22**, on display.

Our display unit is equipped with a 2-pallet APC, Tilt/Rotary tables on both pallets for simultaneous 5-axis machining, and the latest generation of CNC FANUC Series 500i-A. Furthermore, we will be showing off model works as well.

Stopping not only with the display unit, we will be putting forth various other offerings that we know can actualize our customers' requirements, so please make sure to stop by our booth when you attend this year's JIMTOF.

We look forward to seeing everyone at the event.

KIWA Nobumasa, President

Kiwa's Booth: No. E2004

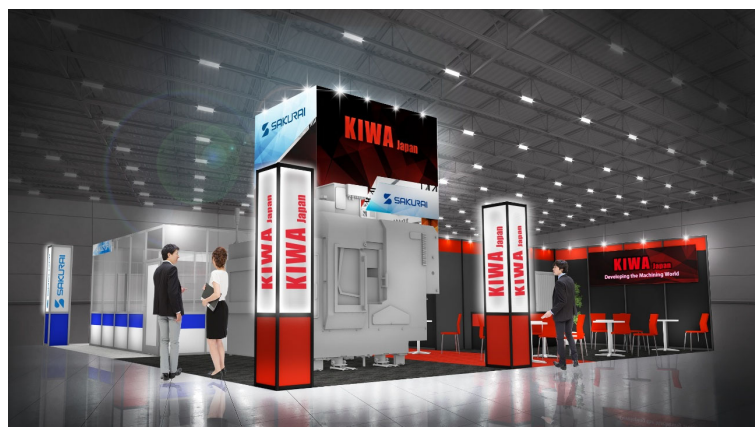

Vertical Machining Center **Triple V22**

3-Axis Column Traverse

From fixture design to rotary table installation, a variety of customization can be done with high flexibility.

Planned Exhibit Specifications:

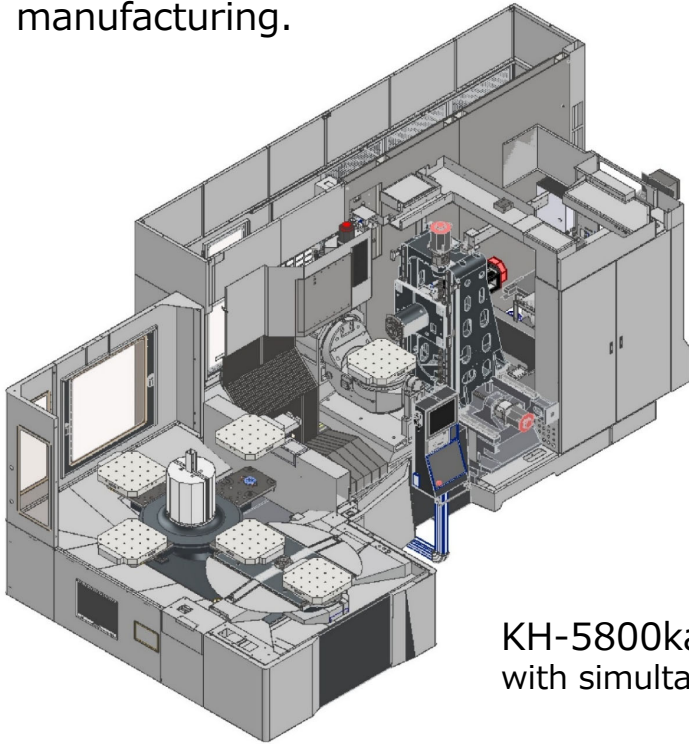

- ◆ 2-pallet APC, simultaneous 5-axis on both pallets
- ◆ Latest generation of CNC FANUC Series 500i-A
- ◆ Stroke (X/Y/Z): 740x410x510mm (2APC)
- ◆ Rapid Feed (X/Y/Z): 75m/min + Acceleration of 1.0G
- ◆ Pallet Change Time: 2.5 seconds (rotation time)

Introducing simultaneous 5-axis option to the KH-5800kai

Not just 2APC, simultaneous 5-axis with 6/8APC possible.
Preserving high speed specifications, supports general parts machining and wide variety of products in small lot manufacturing.

NEW

	KH-5800kai Simultaneous 5-axis
Pallet Size	500x500mm
Max. Work Size	Φ650x400mm
Rapid Feed (X/Y/Z)	80/80/60m・min ⁻¹

KH-5800kai
with simultaneous 5-axis, 6APC, 180ATC

Partnering with Sakurai Ltd. in our collaborative display.
